

19"-cover panel from plastics to face free space in a 19"-rack

- air separation function: cost-saving and very effective possibility to reduce energy costs in data centres (BITKOM guideline "energy efficiency in data centres")
- optical upgrading due to facing the free 19"-spaces
- attractive design owing to chamfered cover front
- little assembly time due to Quick-Clip-System: simply clip-on of the cover panel into the 19" level without any tools
- the cover may be removed wearless and without tools at any time to re-use again
- protection again dust
- fire protection classification acc. to UL94 V-0
- reduction of weight compared to conventional metal covers
