

TiRAX computer cabinet: the new flexible and user-friendly workstation

The new computer cabinet based on the TiRAX series provides the opportunity to install a reliable, user-friendly and optically appealing workstation even in most difficult ambient conditions of industrial environments. With its degree of protection at IP 54 cooling systems can be integrated.

The biggest advantage is his flexibility in adapting to diverse requirements. It can be provided with 19" components or build up to be a computer tower solution. The standard cable entry point is at the bottom, but cables can likewise be inserted through the top or from the sides. The front side can be closed up completely by locking the profile half cylinder.

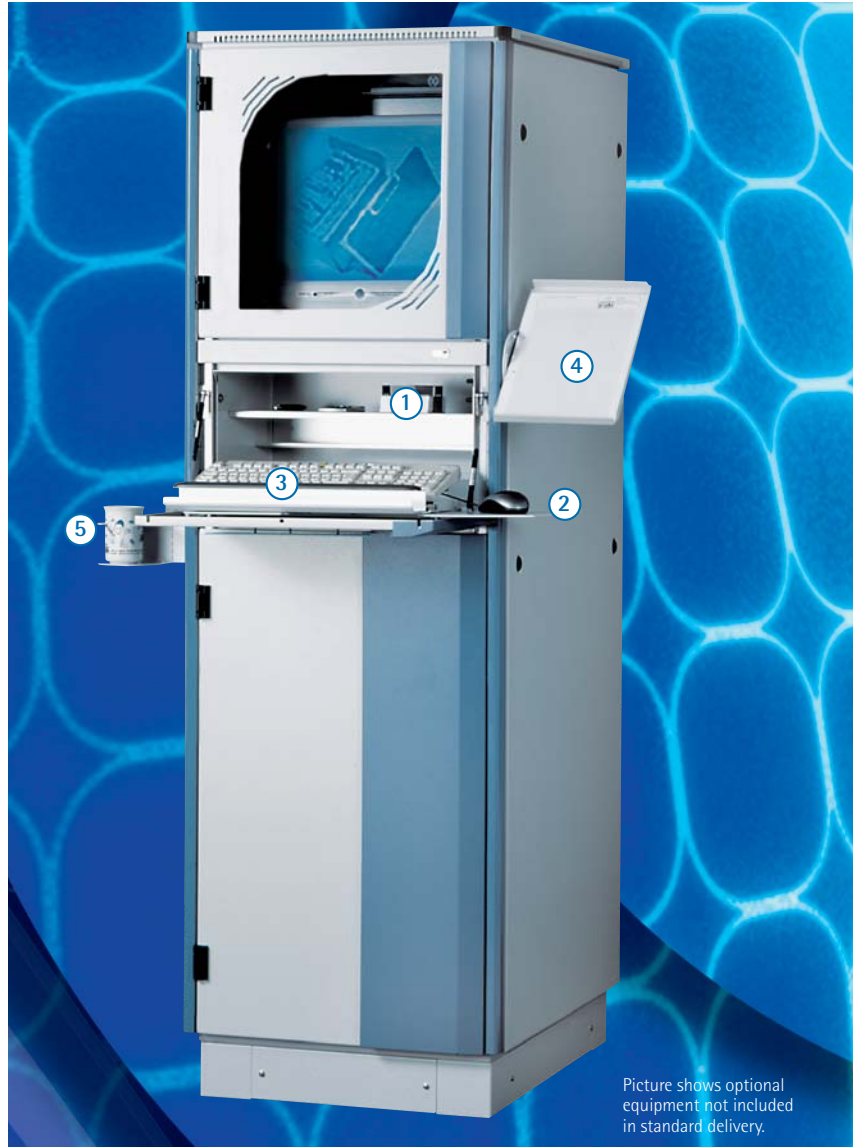

Delivery:

- 1 cabinet frame
- 1 threepart front, consisting of viewing door, operating unit and closed door
- 1 back door with turning lever lock
- 2 side panels
- 1 threepart bottom plate with cable entry plate
- 1 top plate, removable
- 1 earthing set, mounted
- 1 base H=100mm

Practical features for more convenience at work

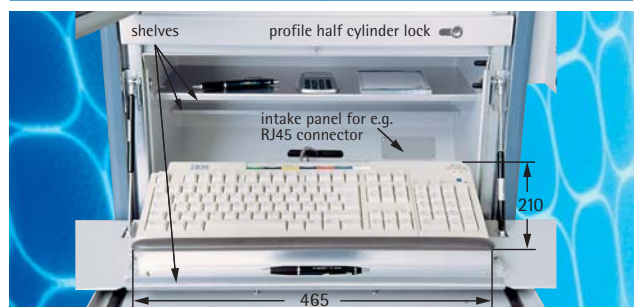

Integrated trays (1) and traversable shelves (2) keep your working area organized and provide enough space for computer mouse etc. The integrated hand rest made of foam (3) makes working at the keyboard more comfortable and ergonomic. Small objects like pocket calculator and writing utensils can be stored in the workstation's expandable compartment. A cup holder (5) and several other shelves are also included in standard delivery.

Available accessories:

- Multit-functional shelf for stacks of paper, folders, telephone etc., can be mounted at any height desired and is adjustable in its tilt angle (4)
- expandable holder for plans or drawings (not shown in picture): space-savily mounted vertically at the cabinet, it can be expanded to hold plans or drawings up to A0 size.
